                                                        Name=Membrane-bound;
IsoId=P0185-1; Sequence=External;
MISCELLANEOUS: The sequence differs from that of the
from BALB/c mice, at 15% of the positions.
SIMILARITY: Contains 3 immunoglobulin-like domains.
                                                                                                                                                                                                                    Name=Secreted;

May regulate T-cell activation. SUBCUNIT: Associates with p56-lck (By similarity). SUBCELLULAR LOCATION: Type I membrane protein. SIMILARITY: Contains 3 immunoglobulin-like C2-type domains. SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       s SWISS-PROT entry is copyright.
